

# The snow accumulation/melting routine

## Parameters:

	meaning	min	max
$T_s$	threshold temperature [C]	-3	3
CFMAX	degree day factor [mm/C]	0	20
CFR	refreezing factor [-]	0	1
CWH	Water holding capacity of snow [-]	0	0.8

Kollat, J.B., Reed, P.M, Wagener, T. (2012) When are multiobjective calibration trade-offs in hydrologic models meaningful? *Water Resources Research*, 48, W03520
